Work Experience

DDO — *Web Developer*
JUNE '19 – AUGUST '19

- o Working with HTML, CSS, and PHP on the WordPress CMS to manage content and make the website more user friendly
- o Worked with Flask, MongoDB, and Linux (Ubuntu) to manage a database resource site for the website
- o Improved the website load time by over 10% and improved the overall SEO ranking of the website
- o Implemented a method to sort the company resources through JavaScript
- o Communicating with industry professionals in order to improve features on the organization's website

Prism Home Inspections — *Full Stack Web Developer*
MAY '19 – JULY '19

- o Revamped the entire company website using Flask, HTML, Bootstrap, and JavaScript
- o Created a fully functional blog portion within the website using PostgreSQL and REST APIs
- o Implemented the ability for users to change their password using tokens for verification
- o Worked towards using a Linux server along with nginx for hosting the website.

Projects

Personal Website
ONGOING

- o Developed my personal website using HTML, CSS, Bulma, and various other JavaScript libraries
- o Beginning to transition the backend of the website to Node.js
- o Followed the Software Development Life Cycle for the creation of the website, including planning, designing, building, testing, and debugging

Reversi
MARCH '19

- o Using the C programming language in order to create a fully functional Reversi game
- o Implemented a basic AI that can score different locations on the board in order to find a good move
